## 2018 (Version B) Wedding Video Packages

### TERMINOLOGY

- **DVD vs. Blu-Ray** – DVD is standard definition presentation and works in a DVD player and/or Blu-Ray player. Blu-ray allows for HD presentation and works in Blu-ray player only.
- **2 Wireless Mics for Ceremony** – one mic on the groom + one mic at podium for readings / homily
- **1 Wireless Mic for Reception** – used to capture amazing sound of your introductions, announcements, toasts, and music
- **Chapter Markers and Menu Navigation** – Discs will include chapter markers and menus for organizing your footage and allowing for an easier viewing experience
- **Guaranteed Turnaround** – We guarantee we will have completed post-production within 16 weeks. Client receives \$50 back for each week past the deadline. Final delivery (shipment or pickup) not part of the deadline.
- **Weekly Updates** – Each week we update a page on our website indicating the status and progress of all our wedding video and photo projects. You'll receive a link to this page after the wedding.
- **Raw Footage DVD** – Bride and groom will receive 1 additional DVD of raw footage to enjoy reliving portions of the day that are usually edited heavily in the main DVD (ex: getting ready, pre-ceremony, post-ceremony, photo shoot, cocktail hour, dancing, etc.)
- **Highlight of the Day** – As an additional feature on your blu-ray and/or dvd, footage of your entire day will be edited into one artistic and creative video, retelling the unique story of your day. Highlights are typically between 3-4 minutes in length and edited to a single song. We will also post your highlight online so you can share with friends and family.

### FAQ

*Q: How long is an average DVD?*

*A: Using our Standard Package as an example, average fully edited DVD / Blu-Ray is 90-120 minutes with the greatest variable being length of ceremony.*

*Q: Can I pick my own music?*

*A: If editing your day involves adding music, our editors use instrumental, royalty free (copyright free) music that we've purchased and collected over the years. Our editors choose musical pieces that work best and match the mood of the part of the day they are editing. Use of copyrighted music is illegal and would endanger our business with risk of fines and jail time.*

*Q: Do I get to choose who my videographer is?*

*A: We will internally assign your videographer based on the details of your day. Often, we like to match up a videographer who may have more experience at your particular venues.*

*Q: Will the videographer get messages from my guests at the reception?*

*A: ONLY if you request us to do so in your video planning form. By default we do not have our videographers get messages from your guests at the reception. After MANY years of doing wedding videography, we've learned that the majority of our couples do not wish us to do this. We are happy to do this for you and there is no charge, but you must make this request in your planning form.*
